Capabilities Statement

Why should I hire The Renew Group?

Renew Group stakes its reputation on your project, no matter the size or scope. 90% of our federal clients **are repeat business. Enough said.**

Does Renew Group have the experience needed to handle this project?

Renew Group stands on its own with a **diverse range** of successful federal contracting experience utilizing our **self-performance capabilities**, but we don't do it all. **The Renew Group** is about **teaming**—be it with our clients—working as their project partner or managing the **experienced subcontractors** needed to get the project done on time **and** with the high degree of **quality expected**. United with our **SBA 8a mentor, Mason and Hanger**, our national subcontractor network extends beyond the local and regional market. These subcontracting partners are **thoroughly screened** prior to being accepted to work with our federal clients.

The Renew Group provides complete project management in all phases of construction including; **design/build, integrated development, historical restoration, structural renovation, demolition and concrete construction**. As a General Contractor, **The Renew Group** maintains a **“Hands on Approach”** by utilizing our capability to **self-perform** with our **masonry, carpentry and concrete work** crews.

The Renew Group has established procedures that consistently provide success in managing and coordinating simultaneous contracts.

The Renew Group will use our network of prescreened subcontractors to ensure we provide the skilled manpower, equipment, materials, and supplies for the client project.

The Renew Group, Inc. is a **Veteran-Owned, HUB Zone, 8(a)** General Contractor who entered the SBA 8(a) program in 2005. Our corporate office is located in Lawrence, Kansas. Since incorporating in 2003, **The Renew Group** team has established a successful portfolio of serving federal, commercial and residential clients.

The Renew Group has proven experience in working with various federal clients including the **Kansas City District Corps of Engineers**, various **Department of Defense facilities (DPW)**, **GSA, VA and National Park Service**. These diverse clients and their projects brings excellent experience and value to your agency. **CCASS ratings are available.**

- ★ **Colmery O'Neal - Hospital Renovation, Bldg 9**, Topeka, KS, Veteran's Administration
- ★ **Ft. Lee Family Housing**, Ft. Lee, VA,

Interior demolition of an occupied 5-level structure and remodel conversion of this 125 hospital room facility into 85 various administrative offices. The project required demolition, hazmat disposal services and special attention to dust control.

This design/build project for the Texas National Guard included plat design, facility layout; civil, and electrical engineering design. Work included construction of roads and foundations for erection of five portable steel constructed armory structures.

The objective for Lake Kanopolis Sedimentation and Trash Rack Removal was to dredge 500 feet out beyond the trashrack gates. Enough silt material was removed so that water flow met the rate of flow established by USACE testing standards.

The historic restoration Lane Lantry Culvert project was contracted for the National Park Service. The bridge was closed to public access until repairs and replacement rock were provided in compliance with historic preservation requirements.

The Renew Group is registered in the Central Contractor Registration (CCR) database. Our CCR profile is current. Other pertinent CCR information for **The Renew Group** is:
